Drive Away Protection System Ews

EWS Drive Away Protection The first version of Drive Away Protection was installed on production vehicles 9/93 through 12/93. Purpose of The System The purpose of the Drive Away Protection system was to reduce vehicle theft as mandat-ed by the European Insurance Commission to combat the high theft rate in European Countries.

Drive Away Protection System (EWS) - Computer Solutions

Purpose of the System The purpose of the Drive Away Protection system was to reduce vehicle theft as mandated by the European Insurance Commission to combat the high theft rate in European Countries. This first version of the Drive Away Protection System added a circuit from the General Module to the DME.

Introduction For (EWS) Drive Away Protection System

• As the starter begins to operate, the EWS III module sends the ISN to the DME and if verified as correct by the DME, drive away protection is cancelled and injection and ignition is enabled. The EWS III module also sends a new changing code to the key transponder through the ring antenna. EWS III (3.2) System

EWS III (3.2) system - BMW key replacement

The EWS II Control Module is linked to the BC, GM, DME, Trans Range switch and the starter for drive away protection operation. The module incorporates an integral starter relay and stores data and codes for communication with the transponder chip.
