for (also, the old model is no more available). This new Nikon macro lens feels solid in the hands.

Best Macro Lenses for Nikon in 2020 [11 Top Picks]

The AF-S Micro NIKKOR 60mm f/2.8G ED is a streamlined macro lens that's considerably thinner and lighter than its rivals. The matte-black polycarbonate body has golden accents and a single switch to toggle from manual to automatic focusing. The lens mount is metal and lined with a rubber gasket for extra protection from moisture and dust buildup.

6 Best Nikon Macro Lens Picks for 2020 - 3D Insider

Naturally, we would assume all subsequent manual focus Micro-Nikkor lenses introduced since then would carry an Ai-S lens specification. Not only this Micro-Nikkor 55mm f/2.8s lens features a faster maximum aperture than the earlier f/3.5 counterpart but it has an improved macro identifications with an overall better finishing.

Micro-Nikkor 55mm f/2.8 Manual Focus Lens

Nikon 105mm F/2.8 Micro-NIKKOR AIs Manual Focus MACRO Lens Condition: in excellent condition fully working order, overall looks clean apart from few minor surface marks to cosmetics only, optics are clean No fungus, No marks, No scratch, only has few micro-blemish spots inside the glass visible under close inspection this doesn't affect image quality.

Nikon Nikkor Manual Focus Camera Lenses for sale | eBay

almost all of the manual focus macro/micro lenses only focus to 1:2 and need an extension tube or teleconverter to go to 1:1. Most of the auto focus lenses focus to 1:1. I have used Nikon micro/macro lenses since the late '70s and haven't run into a bad one yet. I currently use a 55 f2.8 AF and a 105 f2.8 AFD both are excellent lenses.

Re: What's the best Manual Focus Macro lens for digital ...

Nikon 105mm f/4 Micro-NIKKOR (1970-1983). 52mm filters, 17.6 oz./500g, about \$175 used (see How to Win at eBay).. Good choice for macro, but still less working room than we'd like for the best perspective.. The f/4 aperture is fine for normal shooting, but since we lose light at very-close focus distances, an f/2.8 lens makes it much more pleasant to frame, focus and shoot for extended periods.

Best Macro Lenses - Ken Rockwell Review

With macro lenses, focal length influences how close you need to get to your subject (working distance). The greater the focal length, the further you can be from your subject and still achieve the effect of extreme closeness. Smaller focal lengths allow for very close working distances while maintaining easy focus acquisition.

Macro & Close-Up Photography Lenses | Nikon

Technical Highlights: It is an all round telephoto lens for normal shooting as well as close-ups * Telephoto picture coverage of 23° 20'.* Focuses continuously from infinity down to 1/2 life-size and with the PN-11 auto extension ring, from 1/2 to full life-size.* Provides extra working distance for shooting elusive subjects and/or ones requiring supplementary illumination.

If you own a Z series mirrorless or DSLR, whether full-frame or crop-sensor (DX), everything will depend on the lens. Don't be discouraged if you don't own a macro lens, different lenses are also capable of good reproduction ratios. I often use optics like the AF-S DX NIKKOR 18-300mm f/3.5-5.6G ED VR to take good macro photographs.

In Focus: Experimenting with Macro Photography at Home | Nikon

Category. Identify the NIKKOR lens you need: choose wide angle for a more complete view, telephoto for long-focus in a more compact form, macro for extreme close-ups or a teleconverter secondary lens to increase focal length.

55mm f/2.8 Micro-Nikkor | Nikon Manual Focus lenses

However the lens is quite sharp when you focus a bit closer. The normal focus ring allows you to focus up to 1.4 meters, but there is also a macro ring. Depending on your focal range you can get a magnification of 1:4 (35mm) or 1:5.5 (105mm). And the images I got out of that mode are very good. Again, on a scale of 1 to 10 I would give it an 8.
